The Growl of HammerHead

There is a new CD in Whitehorse and it has come for your children.

From the first notes of the new HammerHead self-titled album, the tone is set and it gets right up into your face. Crunchy harmonic guitar chords and slapping bass lines crawling around a heavy back beat. The sound is a bottom heavy brew: a sonic wall of hook-laden sound.

Piercing this incredible barrage is the lone, powerfully raw vocals of Fiona Solon.

To say Solon has vocal prowess is understating the fact. Ability to hit the right note at volume is difficult at the best of times. For those who have ever tried to sing *Bohemian Rhapsody* in the shower, this fact is self-evident. Solon has pipes that would buff rusty iron to a high gloss.

I especially like the vocal processing that brings out that edge in her voice. This balances the overall mix and allows her voice to kick through the guitars.

The track, *Moonwalk*, sounds like an incredible flashback to late 70's arena rock including showcase breaks, solos, feedback flourishes and false endings. Very tasty.

With Fiona Solon's "powerfully raw vocals" and Marc-André Hamelin's guitar "played with an edge of psychedelic free form" and Ian March and Etienne Girard's "polyrhythmic funk back beat", HammerHead has produced a debut CD that sounds like a first CD should.

manhandling his instrument. Listening to a musician put his instrument through such contortions is a pleasure.

Rather than hang back and let Hamelin steal the show, Ian March on drums and Etienne Girard on bass jump through hoops adding a polyrhythmic funk back beat that increases the forward momentum.

Now we come to the part of the review when I divert to the sub-

expression.

HammerHead is a straight ahead driving rock album at its core, recorded by individuals who allow a bit of growl and attitude into their music.

These four musicians have great energy and a dynamic and innovative twist on classic genres.

You need not go further than this as an example of what a first CD should sound like.

I hope it can maintain this level of energy and musicianship. I see great things from this group if it continues to release albums like this one.

Set the volume control for eleven, hit play and begin to dance around.

Check out www.myspace.com/yukonhammerheads to hear some of their tunes and pick up the CD at Triple Js and CD Plus.

DISCourse

with Bill Polonsky

Funktown Blues bring on more of the same, this time in a heavy funk blues vein. All the elements are here: 12 bar blues, call and response between the bass and drums in the breaks all culminating in a classic blues ending as only a woman can sing it.

Marc-André Hamelin plays guitar with an edge of psychedelic free form that speaks of years

ject of potty mouth language.

As my musical hero, Frank Zappa once noted, "There is no such thing as a dirty word. Nor is there a word so powerful that it's going to send the listener to the lake of fire upon hearing it." Thanks Frank, enough said.

I feel if you desire a safe listening environment, listen to Musak. This band is about raw talent and
